## Modulothèque

## !!! IMPORTANT !!!

- Decide where you want the racking to be installed.
- Place the pedestal module(s) on a flat surface.
- Attach the basic module(s) to the wall (from the 2nd one up).
- Do not tighten the screws completely until assembly is complete.
- Do not pull out several shelves at the same time.
- Do not lean on the shelves.
- Do not sit on the bar module shelf.
- Do not climb on the side modules.

## PART

**x2**

Abutting columns of Modulotheque share a pair of feet (see Pedestal Module figs. 5 and 6) Thus to enable you to assemble a run of abutting columns each Pedestal module (MV2) is supplied with 1 pair of feet. You need 1 extra pair of feet to complete the run or for an isolated single column. See installation and assembly (Chapter MV2 or MV17).

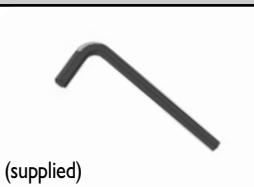

## PEDESTAL MODULE (MV2/MV2L40)

## FASTENINGS

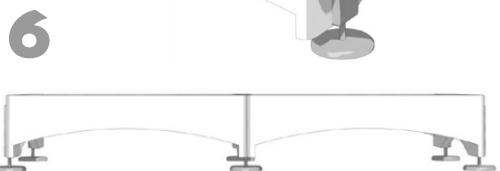

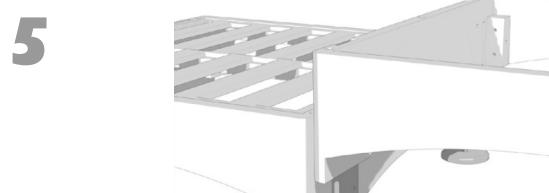

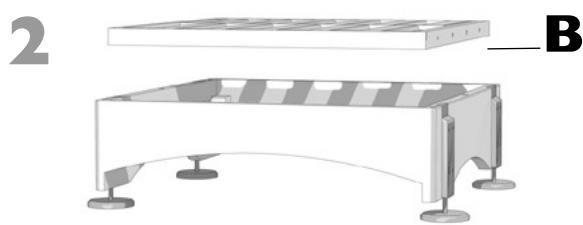

ax8

## TOOL REQUIRED

## PARTS

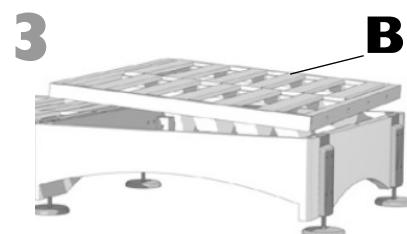

**A****B****Cx2****2**

## 1st MODULE

**1:** Position the foot supports (**C**) (4 for the first pedestal module and just 2 for every other abutting pedestal) in the grooves provided, lining them up with the holes in the wooden pedestal. Screw together diagonally until tight, using 2 screws (**a**).

**2:** Place the module on the floor and set the level and height if it is to be a single or initial module.

**3:** Locate the rack (**B**) in its housing.

## ADDITIONAL MODULES

**4:** Line up the module with the previous module and locate the previous module's foot supports in the grooves of the new basic module.

**5:** Line up the holes and insert the 2 screws (**a**) in the remaining holes in each foot support.

**6:** Check the height and level of the assembly.

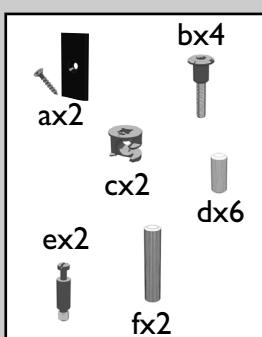

**7:** Locate the rack (**B**) in its housing.

# BASIC MODULE (MVI/MVIL40)

GB

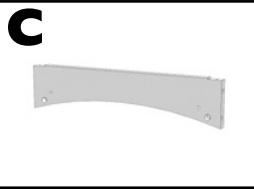

## PART

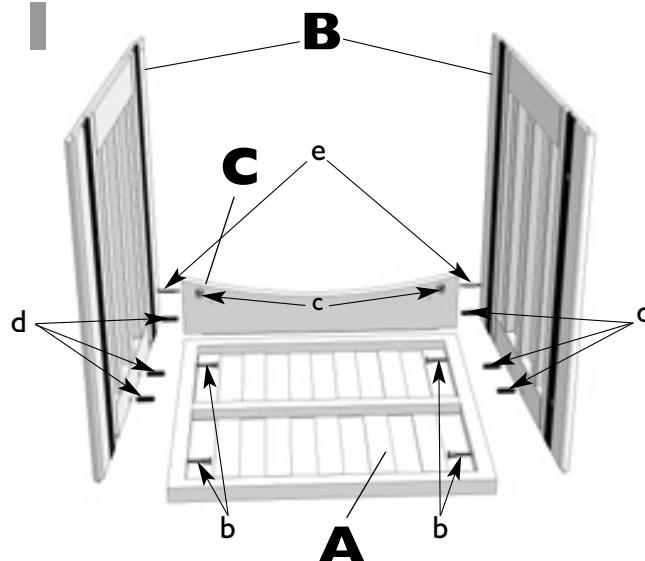

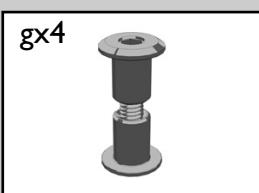

## TOOL REQUIRED

## PARTS

## ASSEMBLY FASTENINGS

## ERCTION

**1:** Fit the 6 dowels (d) and the 2 connecting bolts (e) in the sides (B). Place the 2 bolt locks (c) in the back piece(C).

Fit the back piece (C) on one side (B).

Turn the bolt lock (c).

Fit the rack (A) onto the 2 dowels (d).

Push the 2 screws (b) into the rack and screw together the assembly.

Repeat the same procedure on the other side (B).

2

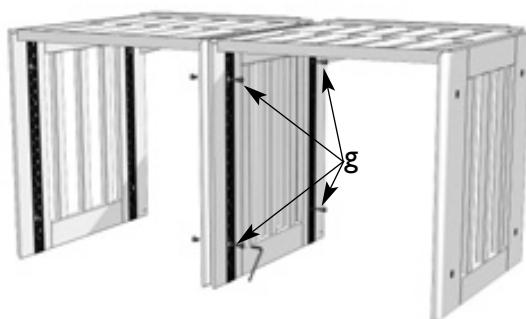

## VERTICAL ASSEMBLY

**2:** Position the 2 dowels (f) in the lower module (Pedestal or Basic).

Fit the basic module onto the lower module.

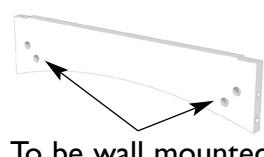

Place the 2 securing plates (a) on the pedestal module and screw together.

3

**3:** When the 2 modules abut, you will need to link them using 4 linking screws (g). Push the linking screws into the holes provided in the shelf support strips on the 2 contacting panels. Tighten until the 2 panels are flush and in line.

4

**4:** The basic modules above the first should be secured to the wall from the 2<sup>nd</sup> level using 2 securing screws (not supplied) suitable for the wall type..

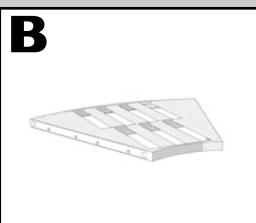

## FASTENINGS

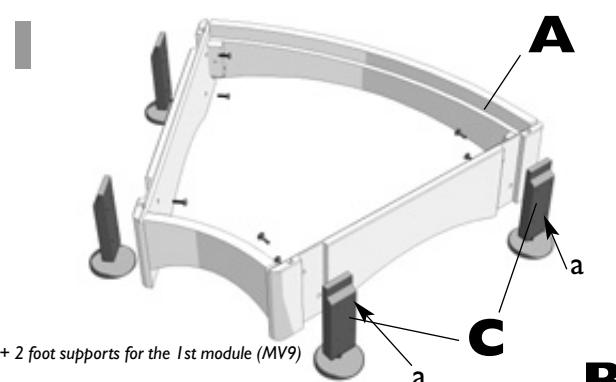

## TOOL REQUIRED

## PARTS

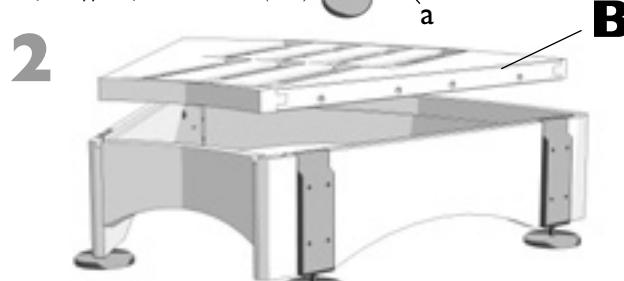

**Warning:** Take the size of the corner module into account before positioning the assembly.

## 1st MODULE

**1**: Locate the foot supports (**C**) (4 for the first pedestal module and just 2 for every other abutting pedestal) in the grooves provided and align the foot support holes with those in the wooden pedestal (**A**). Tighten the 2 screws (**a**) in each foot support diagonally inside the pedestal and lock off.

**2**: Place the module on the floor and check the height of pedestal using a spirit level.

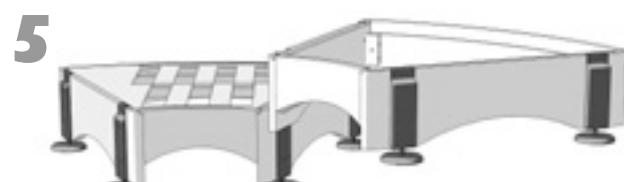

**3**: Place the rack (**B**) in its housing.

## ADDITIONAL MODULES

**4**: Place the module next to the previous one, remembering that each corner module makes a 45° curve. Position the foot supports of the previous module in the grooves of the new pedestal module.

**5**: Line up the holes and insert the 2 screws (**a**) in the remaining free holes in each foot support.

**6**: Check the level of the assembly.

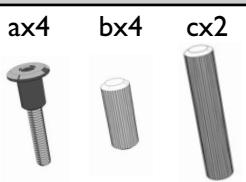

**7**: Place the rack (**B**) in its housing.

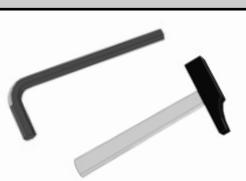

# BASIC CORNER MODULE (MV16)

GB

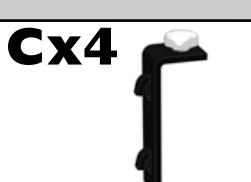

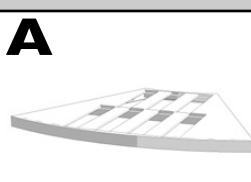

## FASTENINGS

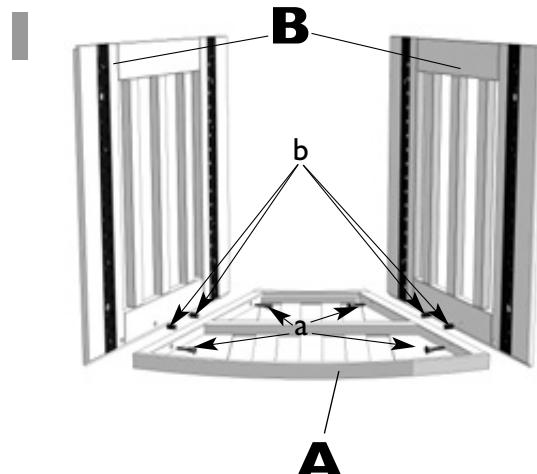

## TOOL REQUIRED

## PARTS

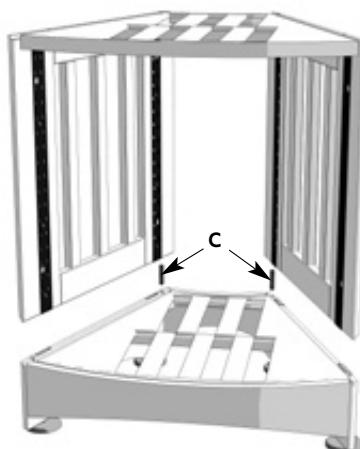

## ASSEMBLY FASTENINGS

## ASSEMBLY

**1** : Position the 4 dowels (b) in the sides (B). Fit the rack (A) onto the 4 dowels (b). Push the 4 screws (a) into the rack and screw together the assembly.

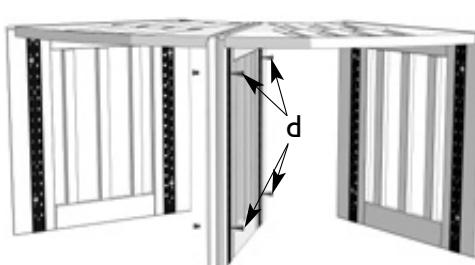

**2**

## ASSEMBLY

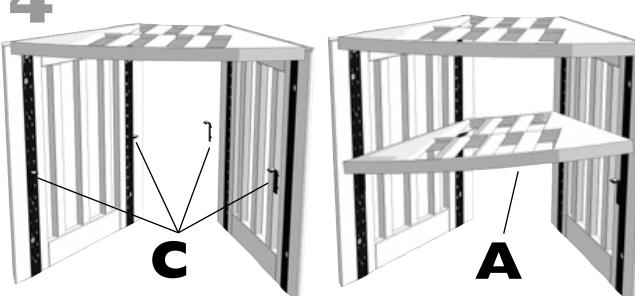

**2** : Position the 2 dowels (c) in the pedestal module. Fit the two sides onto the pedestal module.

**3**

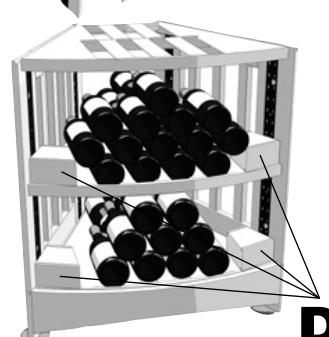

**3** : When the 2 modules are back to back, you will need to link them using 4 linking screws (d). Push the linking screws into the holes provided in the shelf support strips on the 2 contacting panels. Tighten until the 2 panels are in contact and correctly aligned.

**4**

## BOTTLE STORAGE

**4** : Position the 4 rack supports (C) in the shelf support strips and locate the rack (A). Position the 2 bottle stops (D) at either end of the rack (widest part). Then insert your first row of 4 bottles in the rack slots, followed by a series of 5 bottles.

# BAR MODULE (MV6)

## FASTENINGS

## TOOL REQUIRED

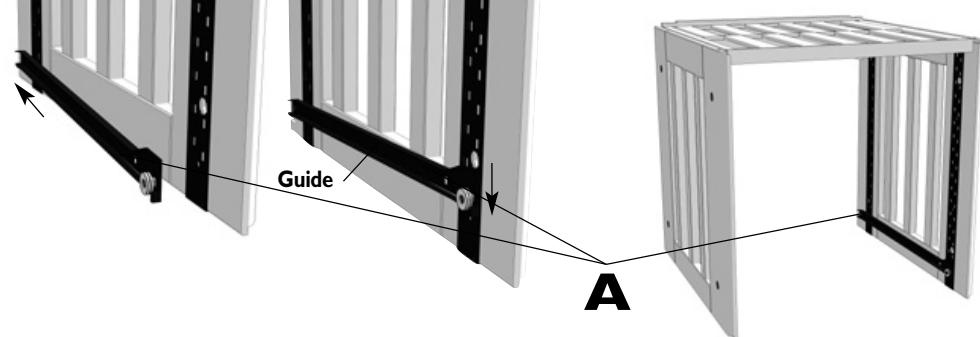

## PARTS

**Ax2****B****C****D****Ex4****Fx4**

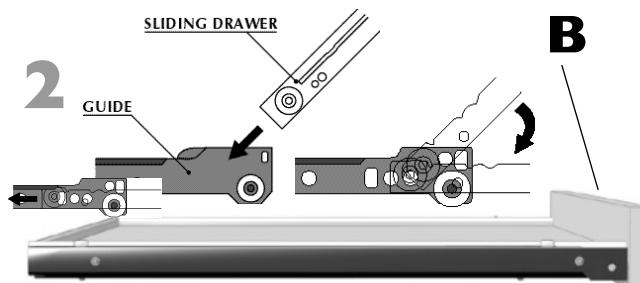

## SHELF

**1** : Place the guides (**A**) in the shelf support strips.

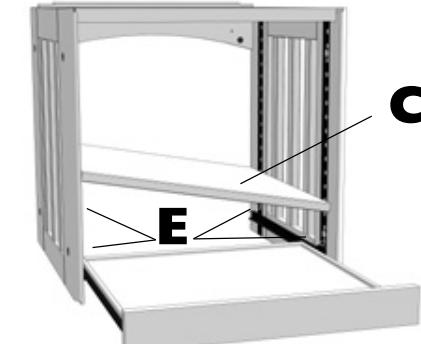

**2**

### SLIDING DRAWER

### GUIDE

**B**

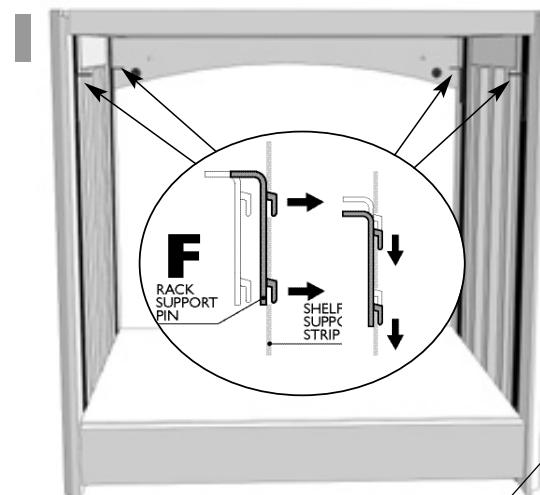

**2** : Insert the sliding shelf (**B**).

**3**

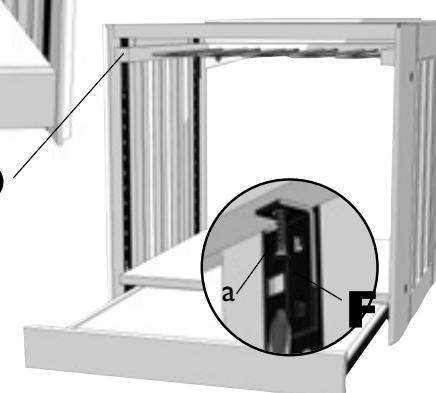

**3** : Position the 4 shelf supports (**E**) in the shelf support strips and set up the shelf (**C**).

## GLASS HOLDER

**1** : Position the 4 rack support pins (**F**) on the shelf support strips so as to create a level.

**D**

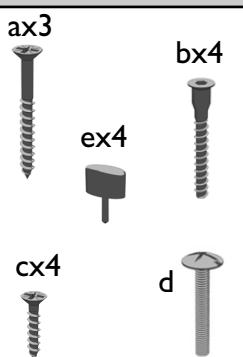

**2** : Position the glass rack (**D**) aligning it on the racks. Tighten the 4 screws (a) lining up the rack support pins holes (**F**) with those in the glass rack.

**2**

# RACK MODULE (MV8)

**GB**

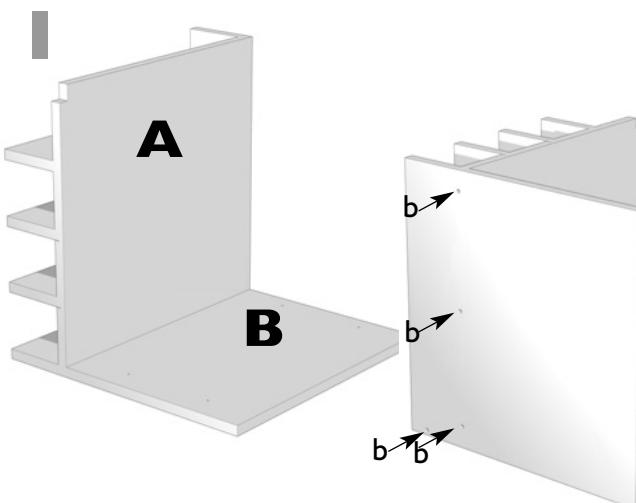

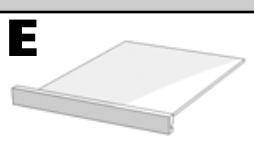

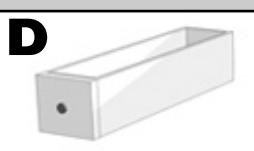

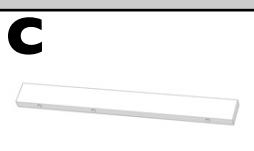

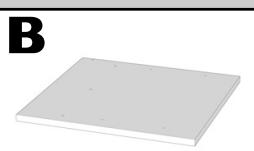

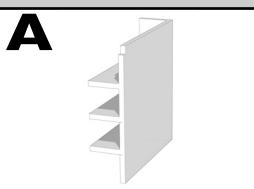

## FASTENINGS

## TOOLS REQUIRED

## PARTS

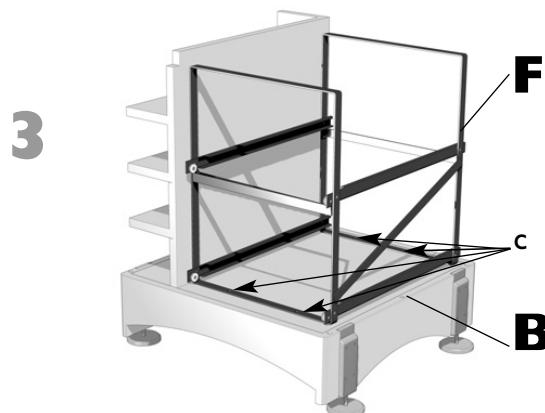

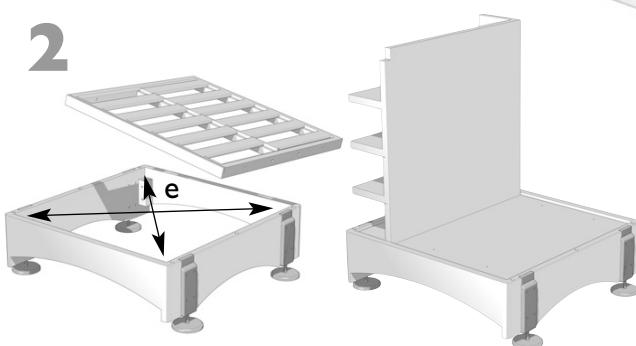

## ASSEMBLY

1 : Secure the "magnum shelving unit" (A) to its base plate(B) using the 4 screws (b) and by lining up the various holes.

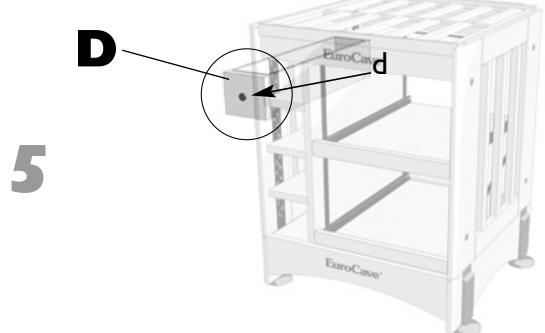

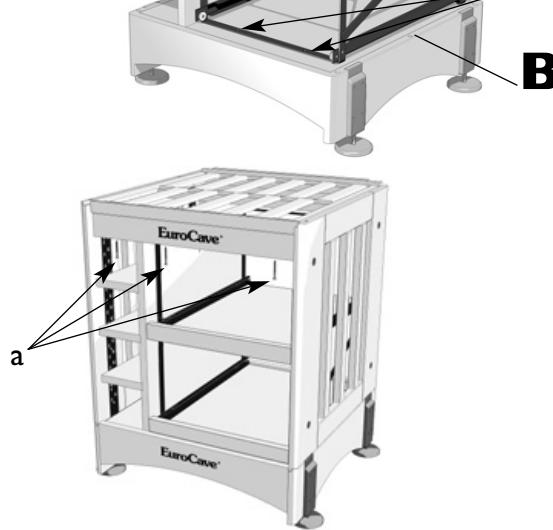

2 : Remove the rack from the pedestal module, nail the 4 parts (e) onto the 4 wedges, and introduce the ready assembled unit in its place.

**WARNING!**  
The Modulorack comes in a separate box.

3 : Assemble the Modulorack (F) (following directions in the box) and secure it onto the base plate(B) using 4 screws (c) and by lining up the holes in the Modulorack with the holes in the base plate.

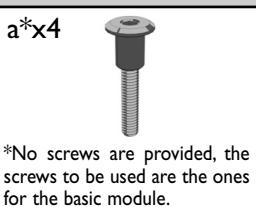

4 : Position the upper cross piece (C) under the rack of the basic module and position it on the edge of the rack, securing it with 3 screws (a).

**N.B.:** oak panels (E) are supplied with the Rack module to replace the original Modulorack ones.

# CROSS MODULE (MV18)

## FASTENINGS

## TOOL REQUIRED

## PARTS

### Ax2

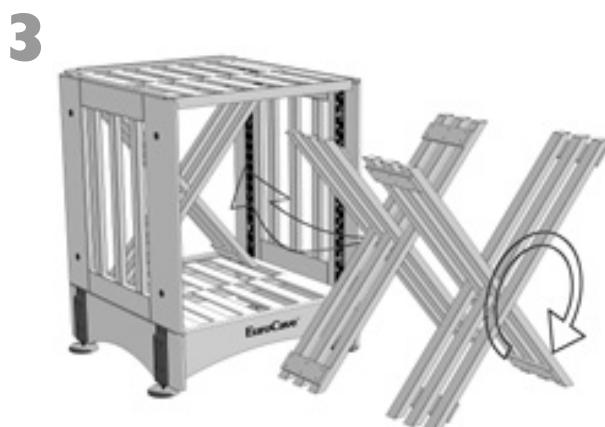

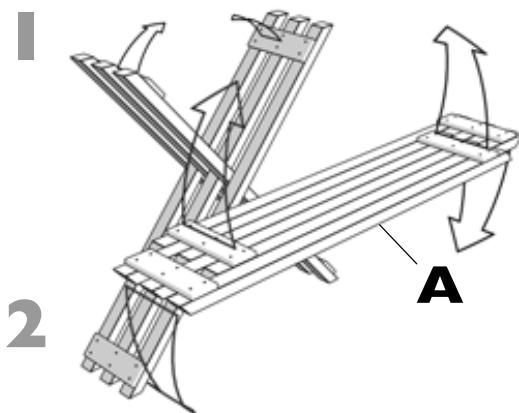

### Bx2

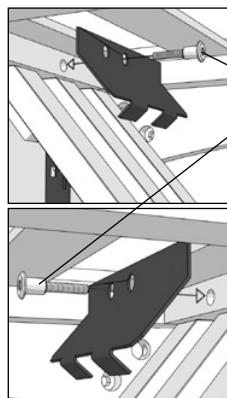

### Cx2

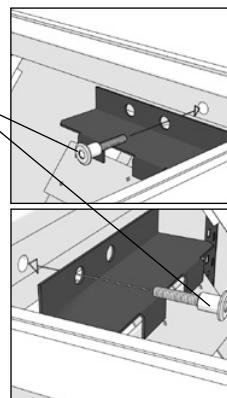

**WARNING!**  
Before locating the cross module, remove all the bottles from the top module.

4 Front securing guide

5 Rear securing guide

## ARRANGEMENT OF SUPPORTS

1 : Unfold the 2 support cross-pieces (**A**) Pull up ends in relation to centre to form an X. Notice that the arms of the X are NOT of equal length.

2:

- a: The rear support cross-piece is placed with the long arms uppermost.
- b: The front support cross piece is placed with the long arms downward

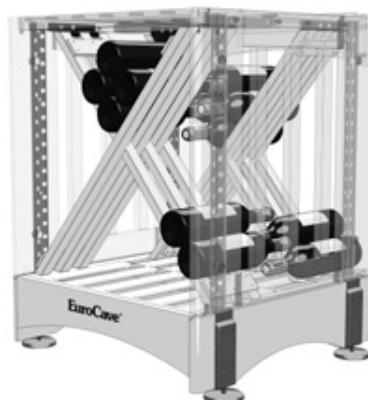

## SETTING UP SUPPORTS

3 : Remove the 4 securing screws (**a**) from the upper rack. Install the rear support at the back of the basic module.

4: Centre the rear support (**a**) by screwing it onto the rear metal 135° guides (**B**) on the upper rack.

5: Install the front support in front of the rear support and centre it (**a**) by screwing it onto the front metal 90° guides (**C**) on the upper rack

**N.B.:** You may expect slight play on the cross modules inside the basic module. This is normal because wood is a living material that moves with levels of atmospheric moisture.

# SHELVES

(MV10-101/MV10L40 - MV10IL40/MVMS10-1/MVMS15-151/MVMS10L40 - MVMS1L40)

GB

Your EuroCave Modulotheque adapts to your requirements and evolves to suit your storage needs.

**UNIVERSAL STORAGE SHELF  
(MV10-101)**

Capacity: 77 bottles

**UNIVERSAL STORAGE SHELF 40 CM  
(MV10L40/MV10IL40)**

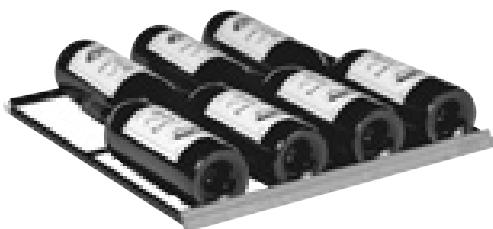

Capacity: 49 bottles

“MAIN DU SOMMELIER” (MVMS10-1)**

Capacity: 12 bottles

**MAGNUM SLIDING SHELF, FITTED WITH THE  
“MAIN DU SOMMELIER” (MVMS15-151)**

Capacity: 7 bottles

**UNIVERSAL SLIDING SHELF, FITTED WITH THE “MAIN DU  
SOMMELIER” 40 CM (MVMS10L40/MVMS1L40)**

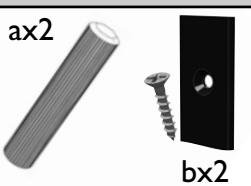

Capacity: 7 bottles

# UPPER FINISH (MV3)

GB

## FASTENINGS

## TOOL REQUIRED

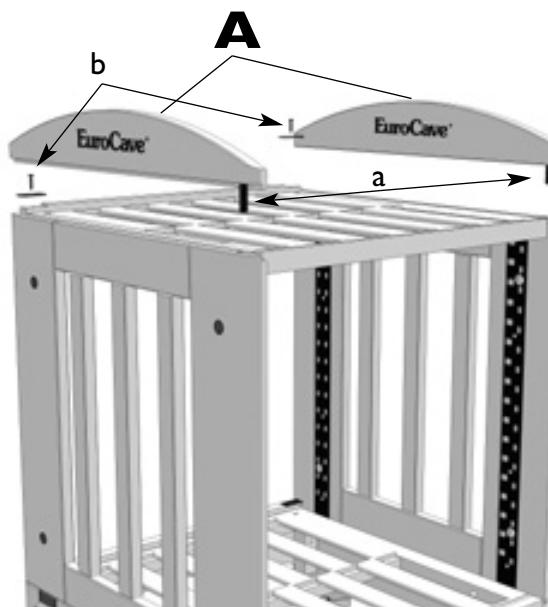

## PARTS

### Ax2

2

## ASSEMBLY

1 : Insert the dowels (a) into the front hole of the upper finish (A), pushing them in until they stop and keeping the pressure on until the upper finish makes contact with the module underneath.

2: Once the finish is in place, secure it with the securing plates (b), using a Phillips screwdriver.

# SHELVES (MV7)

GB

## FASTENINGS

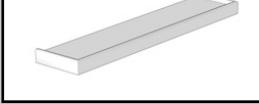

## TOOL REQUIRED

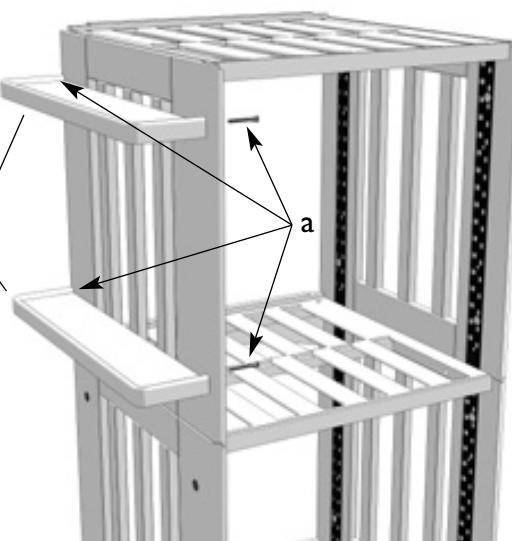

## PARTS

### Ax2

A  
a

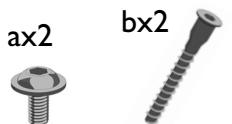

## ASSEMBLY

1 : Secure the shelves (A) using the 4 screws (a) onto the side of a basic module, lining up the holes on the shelving unit with those on the module.

# VERTICAL BOTTLE HOLDER (MV4)

GB

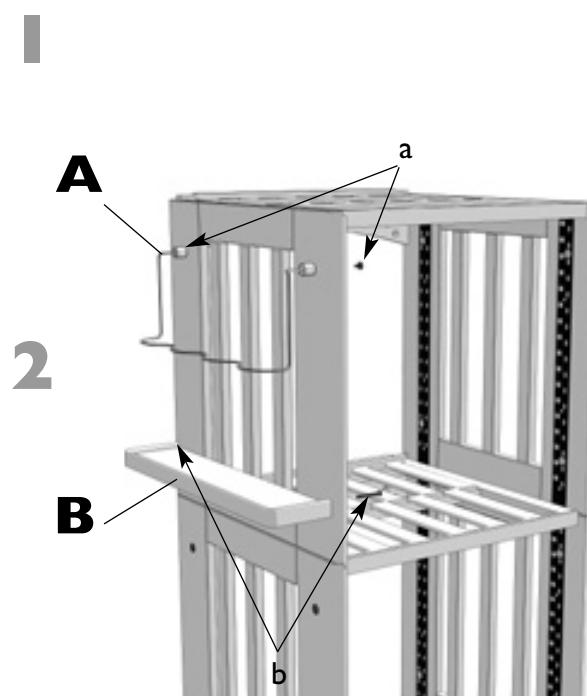

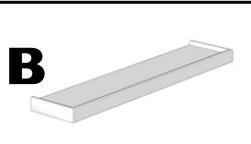

## FASTENINGS

## TOOL REQUIRED

## PARTS

## ASSEMBLY

**1**: Secure the bottle holder (A) using the 2 screws (a) onto the side of a basic module at the top, lining up the holes on the support with those on the module.

**2**: Secure the shelves (B) using the 2 screws (b) onto the side of a basic module at the bottom, lining up the holes on the shelving unit with those on the module.

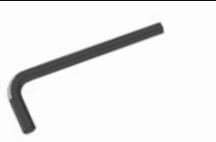

# HORIZONTAL BOTTLE HOLDER (MV5)

GB

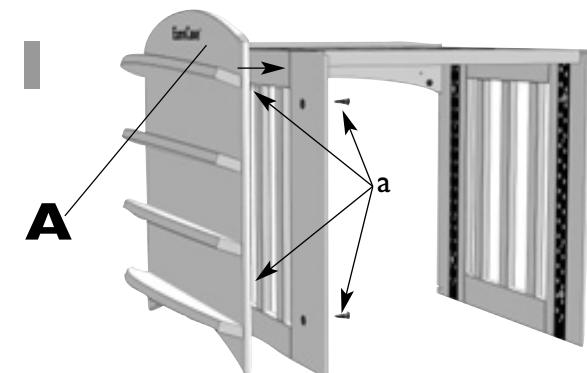

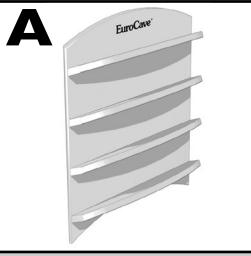

## FASTENINGS

## TOOL REQUIRED

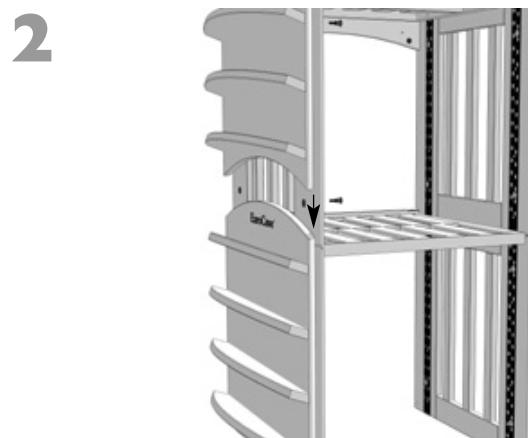

## PARTS

## ASSEMBLY

**1**: Position the horizontal bottle holder (A) against a basic module and line up the 4 holes, inserting the 4 linking screws (a) into all 4 of them. Tighten from inside the basic module.

**2**: Place the bottle holder on the one below, and secure it using the 4 linking screws and tighten from inside the basic module.

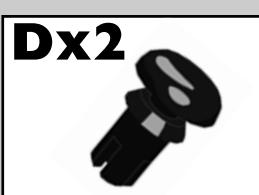

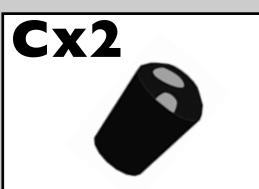

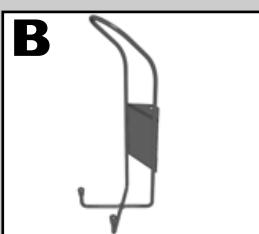

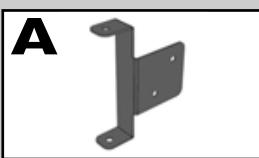

## FASTENINGS

## TOOLS REQUIRED

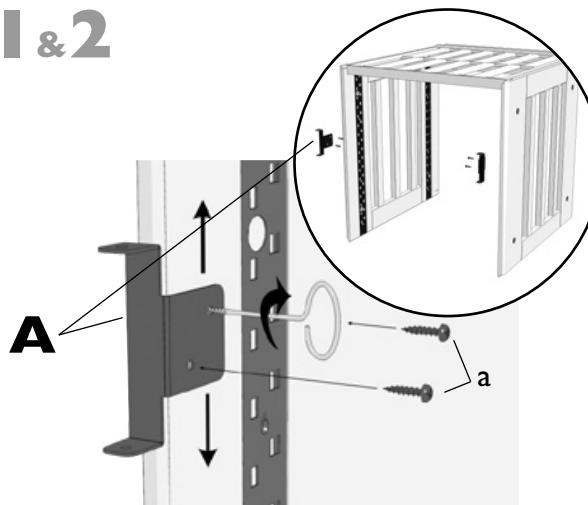

## PARTS

## WARNING!

Before setting up your bottle holder in position, remove the shelves and the bottles from the basic module. If your module is equipped with sliding shelves, the securing tab will be located between two sliders.

## 1 &amp; 2

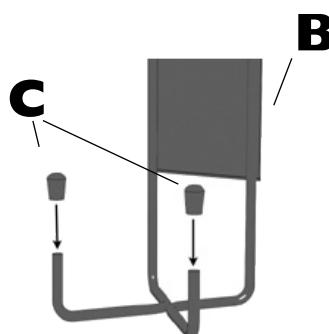

## ASSEMBLY

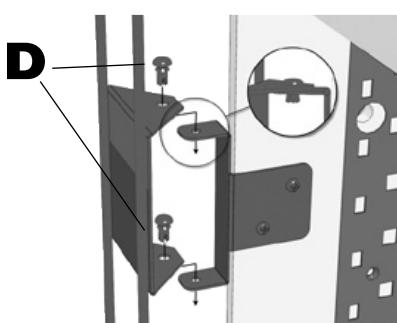

1 : Position the securing tab (**A**) inside the basic module, to the right or left and at the required height. Pierce 2 starter holes using a bradawl.

2 : Secure using 2 screws (**a**)

## 3

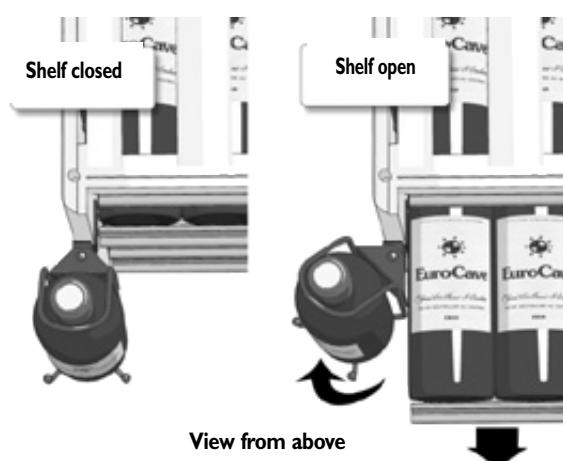

## 4

4 : Position the bottle holder on the securing tab, insert the 2 rivets (**D**) and fit by exerting light pressure on each of them.

## 5

5 : When the bottle holder is in place, it swings on itself so as not to hinder the movement of the sliding shelves.

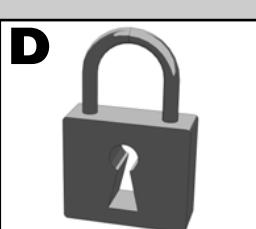

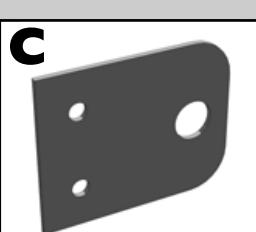

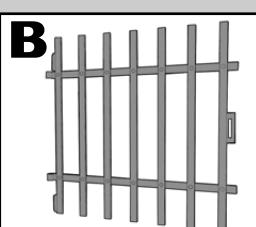

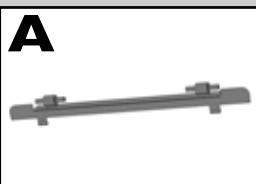

## FASTENINGS

## TOOLS REQUIRED

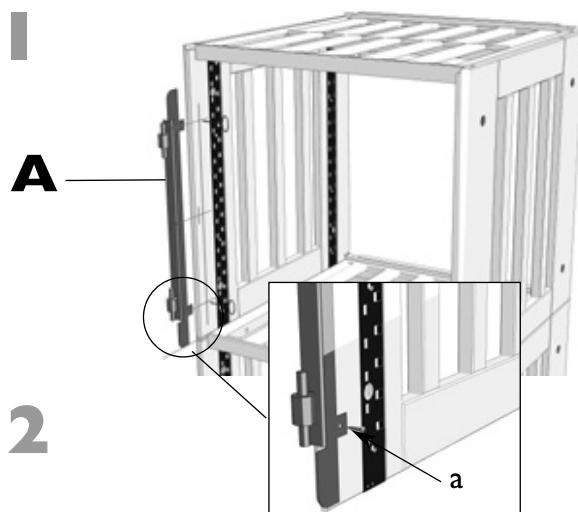

## PARTS

**WARNING!**  
Before setting up the grill, remove all bottles from the module

## SECURING THE HINGE\*

1 : Position the hinge (A) so that the lower part is lined up with the upper corner of the shelf.

2 : Secure the hinge (A) on the side panel of the module using 4 screws (a). (Pierce starter holes with a bradawl for easier penetration into the wood).

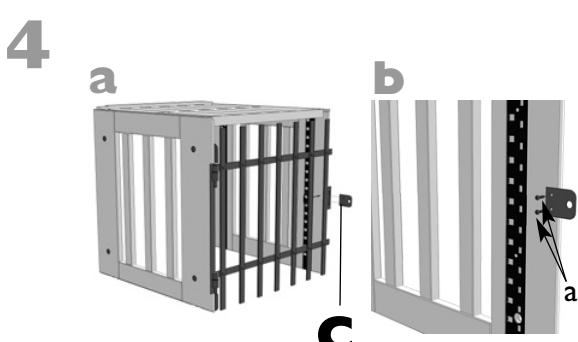

\*N.B.: The grill is reversible and it can be set to open either on the left or right.

**Warning:** The grill adapts to any basic module irrespective of equipment: Shelves, cross storage, etc. However, the Rack Module allows for grid opening only to the right. In the same way, for the Bar module, the hinge must be positioned 25 mm higher.

## INSTALLING THE GRILL

3 : Set up the grill (B) on the hinge pins.

## SECURING THE BOLT

4:

a) Position the bolt (C) against the panel on the opposite side to the hinge. Align it with the recess in the grill.

b) Mark the position of the holes, and make starter holes with a bradawl. Secure the bolt using 2 screws (a).

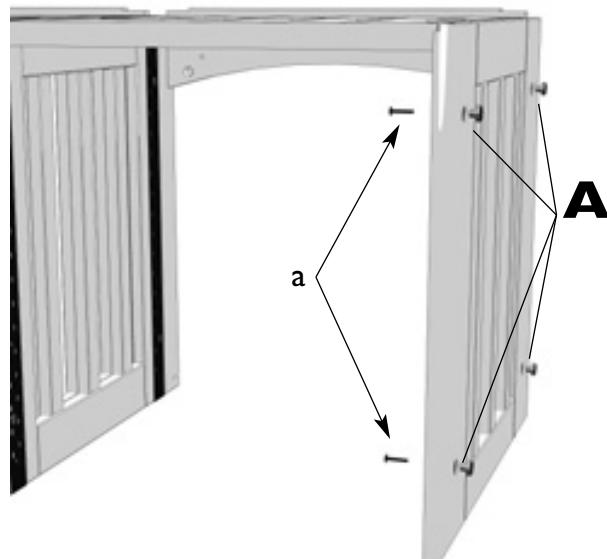

## SETTING UP THE PADLOCK

5 : Put the padlock in place (D)

# FINISHING PLUGS (MV13)

**FASTENINGS****TOOL REQUIRED****PARTS****ASSEMBLY**

■ : In order to fill in any holes left empty, secure the plugs (**A**) using screws.
